

Sprint Review 4

- Features implemented
 - Start of the locations search feature using places api and google maps
 - Some of the classes associated with the design pattern / dcd
- Issues fixed
 - Sequence Diagram feedback addressed
- Implementation review (*What went well in the implementation, what problems occurred, how problems were solved*)
 - Android Studio and Github still require a learning curve, hopefully this will be solved mostly by experience with the code and version control
- Changes made
 - Additional work on the UI for login and account creation
 - Began implementation of searching for locations and places
- Plans for next sprint (*What will be done for the next sprint*)
 - Will get more features coded/implemented
 - Place searching will be fully implemented
 - Additional work with Android Studio navigation
- Scrum Review (*What went well in Scrum, what could be improved, and what changes will be made*)
 - Due to some conflict of schedules, we weren't able to meet over Zoom as much as planned, but were able to use async communication to stay up to date with team members.
