

Project Description Document (/40)

- Group Name and Team Members (/5)
- App Name and Category (/5)
- General Overview and description (/15)
- Similar app descriptions and comparison (three apps minimum) (/15)
- ✓ Each comparison is 5%.
- ✓ Students need to explain the similarities of the applications as well as how their application differs from them.
- ✓ Students need to outline the unique features of the group's applications.
- ✓ The comparison for each similar app will be about one paragraph (half a page).

User story document (/40)

- About two pages or at least 15 – 20 user stories.
- Each user story follows the structure given in the lecture slides.
- For each user story that does not follow the style, deduct -2 points.

Product Backlog (/10)

- Product backlog should match with the user stories. If they do not match, deduct -2 points per missing user story in the backlog.
- All columns based on the projects' details document should be in the product backlog and must be filled out. For any missing column or missing information, deduct -2 points.

Invitation to Github (/5)

- Make sure for the next deliverable, everyone contributes to Github

Invitation to Kanban (/5)

- Kanban board should show all the items of the product backlog.
- If the information in the Kanban board does not match the product backlog, deduct -2 per each mistake.
- If no progress is shown, the grade for this part will be 0.
