

Updated Project Description Document (/5)

- Based on the comments from deliverable 0.
- If the comments were not addressed, the document will be marked as 0.
- If the comments are partially addressed, the document will be marked as 2.5.

Updated User story document (/5)

- Based on the comments from deliverable 0.
- If the comments were not addressed, the document will be marked as 0.
- If the comments are partially addressed, the document will be marked as 2.5.

Updated Product Backlog (/10)

- The comments from Deliverable 1 must be addressed.
- ✓ For any comments that were not addressed, deduct -2 points.
- Product backlog and sprint backlog should match. If they do not match, deduct -2 points.
- Make sure that all of your user stories are in the product backlog. For any missing user story, deduct -2 points.
- All columns based on the projects' details document should be in the product backlog and must be filled out. For any missing column or missing information, deduct -2 points.

Sprint Backlog 1 (/10)

- Should reflect the product backlog. That is, all the user stories that are assigned to Sprint 1 in the product backlog, should be shown in Sprint Backlog 1.
- ✓ For any missing user story, deduct -2 points.
- ✓ If Sprint Backlog 1 does not reflect the product backlog, deduct -5 points.
- ✓ Note that, if, for example, you are doing Knowledge Acquisition for a user story in this sprint, it should be shown as in progress with KA in Sprint Backlog 1.
- All columns based on the projects' details document should be in the product backlog and must be filled out. For any missing column or missing information, deduct -2 points.

Updated GitHub (/5)

- Contributions should be consistent, and all students contribute.
- If a student does not contribute to Github, the student will be graded as 0.

Updated Kanban (/5)

- Kanban board should show progress.
- If the information in the Kanban board does not match the product backlog and sprint backlog 1, deduct -2 per each mistake.
- ✓ For example, if user story 1 is in Sprint Backlog 1, then it should be shown as in progress on Kanban Board as well.
- If no progress is shown, the grade for this part will be 0.

Sprint Review 1 (/10)

- Should follow the template posted on Brightspace.
- For any missing item from the template, deduct 2 points.

SRS (/40)

- Students are expected to have about 15 – 30 functional requirements and 10 – 15 non-functional requirements.
- ✓ If the number of FR is below 15 and/or the number of NFR is below 10, deduct 5 points for each of them.

- For each wrong requirement, deduct -2 points.
- If UI doesn't exist, deduct -10 points.
- Use cases are not required.

Software (/10)

- The implementation should have been started.
- ✓ If there is no implementation, this part will be graded as 0.
- It is recommended that in this deliverable, students focus on setting up the environments and the necessary requirements and dependencies.
- ✓ If there is nothing, deduct -5 points.
- A README file also needs to be created.
- ✓ If there is nothing, deduct -5 points.
